Medical Devices (MD)

The EU Regulation 2017/745, which enforced on May 26, 2021, in all EU countries, replaces Directive 93/42 / EEC (standards EN 455 parts 1,2,3 and 4) and provides the requirements for the Medical gloves production, as well as the obligations of labeling and assessment of biological safety and validity. Gloves are medical devices and ensure protection from contamination to the patient and to the user, they as considered a real barrier to fluids and microorganism.

AQL
≤1,5

AQL is the Acceptable Quality Level of the product and indicates the acceptable maximum number of flaws during a sample inspection. The higher the AQL value is, the lower is the product quality. The strict European regulations regarding Medical Devices (standard EN 455-2) and Personal Protective Equipment (REG. EU 2016/425 - standard EN 374-2) uniformly require an AQL for micro-holes ≤ 1.5 as an effective barrier against microorganisms (fungi and bacteria).

Personal Protective Equipment (PPE)

The new PPE Regulation EU 2016/425 has amended in April 2018 and replaced the previous PPE Directive 89/686/EEC. The new PPE regulation now specifies three classes based on risk definitions:

CAT I: minimal risk; self-certified.

CAT II: risks other than those listed in Categories I and III; certified by approved body.

CAT III: very serious risks which may cause death or irreversible damage to health; certified by approved body.

Only the approved bodies may issue a CE mark for PPE CAT II and CAT III. The gloves may not be sold or used without a proper CE mark.

EN 420:2003 + A1:2009

This standard defines the general requirements for glove design, marking and sizing applicable to all protective gloves.

HOW TO MEASURE YOUR HAND IN ORDER TO CHOOSE THE RIGHT GLOVE SIZE

- Use a dressmaker's cloth tape to measure the circumference of the palm of your hand at its widest point (in mm).
- Cross reference that measurement with the table provided below.

	XS	S	M	L	XL	XXL
GLOVE SIZE	6	7	8	9	10	11
HAND CIRCUMFERENCE - MM	152	178	203	229	254	279

EN 374-1:2016+A1:2018

This standard specifies the capability of gloves to protect the user against chemicals and/or micro-organisms.

VIRUS

For protection against bacteria, fungi and virus. The term VIRUS underneath is enclosed to the biohazard pictogram. Tested according to ISO16604:2004 (Phi-X174 bacteriophage).

Permeation Time

It is the time taken for the hazardous liquid to pass through the gloves and get in contact with the hand's skin.

PROTECTION INDEX	BREAKTHROUGH TIME
Level 1	> 10 Min
Level 2	> 30 Min
Level 3	> 60 Min
Level 4	> 120 Min
Level 5	> 240 Min
Level 6	> 480 Min

Degradation

It is the change in puncture resistance of a protective glove due to contact with a chemical. The change after chemical contact shall be tested for all permeation tested chemicals on the glove and the result mentioned in the instructions for use.

Food Contact Material (FCM)

The gloves for alimentary use are not only a fundamental hygiene measure, it is also an FCM - Food Contact Material (Regulation EC 1935/2004 - Italian Ministerial Decree 21.03.1973, EU Reg. 10/2011 and subsequent updates and changes).

What are FCMs? "Any material or article intended to come into contact with food shall be manufactured in compliance with good manufacturing practice so that they do not transfer their constituents to food in quantities which could: endanger human health, cause an unacceptable change in the food composition, or bring about a deterioration in the organoleptic characteristics thereof."

All subjects in the food production chain (producer/distributor/final user) are legally obliged to verify and respect the requirements of the legislation regarding FCMs. In line with law requirements, all Reflexx gloves are tested for overall and specific migration, using food simulants as shown in the chart here below.

EDIBLE FOOD GROUP TYPES AND SIMULANTS ACCORDING TO REG EU 10/2011

ABBREVIATION	FOOD SIMULANTS	SIMULATED FOOD
Food simulant_A	Ethanol 10% (v/v)	Aqueous
Food simulant_B	Acetic acid 3% (p/v)	Acid

NITRILE MICROSANDY GLOVES

Polyamide/spandex glove.

The presence of Spandex increases the elasticity of the glove, also limiting the penetration of liquids.

Nitrile Microsandy coated palm which provides an excellent grip and increased oil and water repellence.

Ideal for use in damp working environments or in the presence of oil and grease.

Dimethylformamide (DMF) free.

EN 388:2016+A1:2018 - 4121X
